

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 12, 2010

Water Body Under Evaluation:

Water Body ID #: 3422
Name: Mineral Creek (Class C)
Length of Segment: 4.6 miles
County (ies): Johnson

Use Attainability Analysis (UAA) Study:

UAA ID #: 0954
Submitter: SES. Inc
Date(s) Conducted: September 18, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in August 2008 and no WBCR was observed. A road/path was photographed going to the creek. No interviews were conducted during this survey.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion for WBCR at 1 of 3 sites, but this depth is possibly due to a log jam noted in the UAA at site three. Since it is unclear whether or not the log jam is causing the depth, and since the other two sites were very close to meeting the maximum depth criterion, the committee does not find sufficient cause to remove WBCR, and recommends that this use be retained.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
